

Project Design Phase-I
Proposed Solution Template

Date	19 September 2022
Team ID	PNT2022TMID01351
Project Name	Project – News Tracker Application
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Multiple news-sharing applications can be used by one user, and these applications are frequently inundated with notifications. Furthermore, a lot of fake news is broadcast. A news-sharing app seeks to make it simple for users to access daily important and relevant news while also emphasising that the content is authentic and from reputable sources.
2.	Idea / Solution description	The app should list all of the trustworthy sources from around the world and then specify in each article which source has verified this news because I'm assuming that consumers can't tell the difference between true and fake news.
3.	Novelty / Uniqueness	Creating a user interface that is appealing to customers and delivering news headlines with more details.
4.	Social Impact / Customer Satisfaction	Making people aware of how to overcome negative thoughts and disseminating news that is socially responsible. To ensure customer satisfaction, we track all news. In today's world, knowledge will be more useful.
5.	Business Model (Revenue Model)	In addition to promoting advertisements for quality products, one of our first and most important tasks is to provide the public with quality information or news.
6.	Scalability of the Solution	The high data storage capacity, processing power, and networking capabilities of this application can all be scaled using cloud computing infrastructure. Scaling is quick and simple to do.
