Python file

```python
import ibm_db
conn = ibm_db.connect(

"DATABASE=bludb;HOSTNAME=#;PORT=32731;SECURITY=SSL;SSLServerCertificate=Dig
iCertGlobalRootCA.crt;UID=#;PWD=#",
    '', '')
print('conncetion successfull')
```

For security reasons I'am not going to submit my database username,password,hostname in git
